Transforming Education Science Expo at Neuseway Nature Park

STEM East presents Transforming Education Science Expo on Saturday, April 21st, 10:00 a.m.- 5:00 p.m., at Neuseway Nature Center Park, 403 W. Caswell St. Kinston, NC. This event is part of the 2012 North Carolina Science Festival. This is a free event, open to the public.

Join educators, students, Boy Scouts, and Business innovators, at the Neuseway Nature Center, for an exciting day of Science Exploration, and adventure. Multiple exhibits will be on display, including STEM related educational material, and several "hands on" vehicles to view and explore. We are extremely excited to have the MIT Fab Lab (Fabrication Lab), as a main attraction at the Science Expo. The Mobile Fab Lab will facilitate a tour and allow the opportunity to actually create something in the Lab. Other vehicles to tour and explore will include the LCC Machinist Mobile Unit, Craven County Schools Bio Bus, NC Progress Energy Electric Car, Cherry Energy Propane Truck, and Boy Scout activities and displays (BSOA Badge award activities will be sponsored.) All events and activities are free of charge. Concessions will be available, and provided by Full Draw Archery Team, as a fundraiser for their organization.

The beautiful nature based park, located on 55 acres along the Neuse River, offers many educational opportunities, in a relaxed natural setting. www.neusewaypark.com For more information about the STEM East Science Expo, contact Rita Spence at 252-523-6454 or ritaspence@embargmail.com

STEM East Transforming Education Science Expo, is featured in the 2012 North Carolina Science Festival (www.ncsciencefestival.org) promotions. The NCSF spans two weeks, April 13-29, 2012, and features science events across the state.

"The North Carolina Science Festival is about communities coming together to celebrate the wonders of science," said Jonathan Frederick, NCSF director. "Thanks to the talents of our event hosts across the state, there's something for everyone."

The North Carolina Science Festival is a two-week statewide series of events showcasing science, technology, engineering and mathematics (STEM). It includes hands-on activities, science talks, lab tours, nature experiences, exhibits, performances and other events, and engages a wide range of audiences while inspiring the next generation. The 2012 Festival Champion is Time Warner Cable. The Festival is proudly produced by UNC-Chapel Hill's Morehead Planetarium and Science Center's produces the Festival. Charlotte's Discovery Place is a key strategic partner. Learn more at www.ncsciencefestival.org.
