

BIG Savings on Propane Appliances!

Many propane appliances can be installed at great savings **right now**, thanks to generous rebates from the North Carolina Propane Education and Research Foundation. This can save you hundreds of dollars for every appliance you purchase, including:

Gas pack

\$250 Rebate!

- Packaged all-in-one unit installed outside your home
- High-efficiency propane gas furnace keeps you warm even on the coldest days
- Cooling component keeps you comfortable through the summer

High-efficiency propane furnace

\$250 Rebate!

- Produces enough thermal energy to heat your home without the need for a backup system
- More than 90% efficient; consistently delivers heat in the 120°-140° range
- Can last up to 10 years longer than electric heat pumps, when properly maintained

Hybrid heating system

\$250 Rebate!

- Also known as a dual fuel system
- Propane furnace “backs up” your electric heat pump when temperatures get too cold
- Overall system is more energy efficient, provides greater comfort and has a smaller carbon footprint

Hurry! *Rebates are valid while funds remain available.*

\$500 maximum rebate funds available per household or single location per year.

Don't miss out on these other propane rebates

Propane tankless or storage tank water heater

\$150 Rebate!

- **Costs less to operate** than electric heaters, with a hot water recovery rate that's much faster than electric models
- **Versatile, efficient and reliable** hot water solution, with a wide range of capacities to meet demands for any home

Vented room heater or wall furnace

\$150 Rebate!

- **Less expensive** to operate than electric space heaters
- **Easy to install**, incredibly efficient and extremely safe
- **Clean burning**; fewer emissions created compared to electric and fuel oil space heaters

Propane cooktop/range

\$50 Rebate!

- **Provides a much higher degree** of control because of precise temperatures and even heat distribution
- **Fast, precise heating** and instant-on, instant-off controls offered by propane gas ranges just cannot be matched by electricity

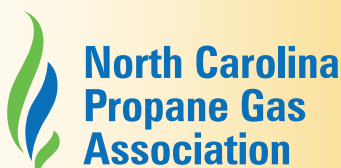

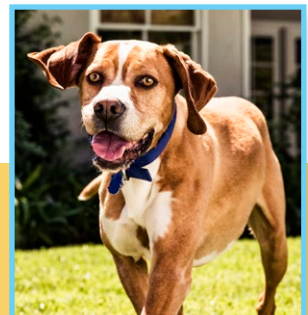

Propane Clothes Dryer

\$50 Rebate!

- **Dries clothes more efficiently**; operating cost is about half as expensive as electric dryers
- **Moist heat of propane** dryers causes less wear and tear on your favorite clothes

Tell your contractor company that it can also get rebates for installing eligible propane appliances for you.
