Want the warmth, comfort and beauty of a fireplace without the hassles of prep and cleanup? Then a propane gas log set may be right for you.

Cherry Energy offers vented and vent-free gas log sets for your home or outdoor hearth, with selections from trusted brands like Majestic, RH Peterson and Empire. Contact us today or stop by our showroom to learn more!

With the Covid19 outbreak we have seen heightened interest in Outdoor Living Areas. We are excited to share these images sent to us by Cherry Energy customers enjoying their new Propane appliances. What can we add in your back yard?

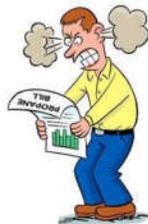

PROPANE SAFETY INFORMATION

Propane is a very safe fuel, but as with any energy source, there are steps you should take to further ensure your safety.

- ◆ If you suspect a gas leak, immediately evacuate everyone from the area and call Cherry Energy.
- ◆ Learn what propane smells like. We are including a "scratch & sniff" pamphlet to help you recognize its distinctive odor.
- ◆ Know where your gas lines are buried so you won't dig them up while working in your yard. Call 811 before you dig!
- ◆ Keep your gas appliances properly serviced to maintain efficient operation. Need anything serviced before Winter? Call us!
- ◆ Please call us first if you intend to connect any new appliances to your propane tank.

Never tamper with supply lines, safety devices, regulators or storage tank fittings. Never use a propane gas range or grill to heat your home. Never use an open flame to test for propane leaks.

LET'S TALK GENERATORS!

The talk now is whole house generators from brands like Briggs and Stratton, Champion, Generac and Kohler. These units are permanently installed and automatically come on when you lose power from the grid, whether you are home or away. These units run on natural gas or propane and sit outside just like your A/C unit. These air cooled units come in sizes from 6-24kW. Average total cost installed is between \$7,000-\$13,000 depending on brand and size. Larger liquid cooled units are available for commercial applications or mansion sized homes.

Where a whole house generator may not be an option, Generlink is a socket mounted transfer switch that is permanently installed behind your electric meter. Generlink delivers generator power directly to your breaker box, eliminating the hassle of running power cords through your home. Requires a 240v 4 prong outlet on your portable generator. A power cord is provided to connect your generator to the Generlink fixture at your meter. Average cost is \$1,200-\$1,300 depending on the size of your generator.

CUSTOMER PRICING NOTICE FOR CREDIT/DEBIT AND ONLINE PAYMENTS

Credit ~ 3.49%
Debit ~ No Fee

Dear Valued Customer,
Beginning October 1, 2020, to cover the cost of credit card acceptance, we will impose a surcharge of 3.49%, which is not more than our cost of accepting cards.

There is no fee for debit cards.

Meet Seth

"We should all be like Seth. Seth installed my gas logs. He called me before he came to let me know his arrival time.

He used gloves when unpacking everything in my home. He meticulously took everything out of my fireplace and into my garage.

He made sure I called my alarm company to double check that my carbon monoxide alarm was working.

He explained my pilot light, my logs, my remote to me. He was beyond professional courteous and polite.

I am thankful this Thanksgiving November for a world of people like Seth"

- Elizabeth Wooten

Thank You!

"Cherry Energy, gets a top rating from me. You are professional, trust worthy, reliable and dependable....This speaks volumes about any company that measure up to your standard. Continue being a trail blazer in the field of excellence in service."

From a satisfied customer,
Willie N.
