Want to spruce up your backyard?

A fire bowl should do the trick. Pictured below is a recent customer install. S'mores not included!

### Bigger Doesn't Mean Better

These days, it's hard to find a heating-fuel and service company that isn't part of a national chain or a major corporation. So it's no surprise when our customers tell us how much they appreciate working with a family-owned company that's been in the neighborhood for over 93 years.

In our business, we believe in the Golden Rule: Treat your customers the way you'd like to be treated. People tell us they value our fair and transparent pricing as well as all of the services we offer that make their lives a little easier.

Rest assured, you can count on us for dependable deliveries and emergency service no matter how bad the weather gets. Please let us know what we can do to help YOU throughout the heating season.

### Energy Saving Tips:

- Seal all cracks around windows and doors with caulking and weather stripping.
- Install a programmable thermostat that will automatically adjust the temperature according to your schedule. 68 degrees is the ideal temperature recommendation.
- Upgrade your wood-burning fireplace. Choose an energy efficient insert.
- Switch the ceiling blade rotation (clockwise rotation in the winter time)
- Switch to cold water when washing laundry.
- Set water heater to 120 degrees or lower.

### PROPANE SAFETY INFORMATION

Propane is a very safe fuel, but as with any energy source, there are steps you should take to further ensure your safety.

- ◆ If you suspect a gas leak, immediately evacuate everyone from the area and call Cherry Energy.
- ◆ Learn what propane smells like. We are including a "scratch & sniff" pamphlet to help you recognize its distinctive odor.
- ◆ Know where your gas lines are buried so you won't dig them up while working in your yard. Call 811 before you dig!
- ◆ Keep your gas appliances properly serviced to maintain efficient operation. Need anything serviced before Winter? Call us!
- ◆ Please call us first if you intend to connect any new appliances to your propane tank.

**Never** tamper with supply lines, safety devices, regulators or storage tank fittings. **Never** use a propane gas range or grill to heat your home. **Never** use an open flame to test for propane leaks.

***Your Safety is our #1 Priority!***

**THINKING ABOUT A GENERATOR?**

Installing a back up generator is a smart move—and a great investment in your safety and comfort! A whole house generator will switch on automatically when the power goes out; keeping all your appliances running and giving you that extra peace of mind.

**Does your propane generator need service?** Our certified technicians are here to install and/or service your generator on an as needed basis, or annually. Give us a call today to see how we can help you with your generator installation or service. Please visit our generator page at [www.cherryenergy.com/propane/propane-appliances/generators](http://www.cherryenergy.com/propane/propane-appliances/generators).

***Celebrating 93  
Years in business!***

Pictured: On Memorial Day 2021, we honored 1st Lt. Guy T Cherry Jr, who died at the age of 19 while serving his country. Five generations of Cherry Men! From founder, Guy T. Cherry all the way to the newest generation, Jules Cherry (grandson of Jay Cherry, President, and son of Jason Cherry, VP).
